DETAILED ACTION

This Office Action is in response to the Applicant's responses filed on 1/7/05.

Election/Restrictions

Applicant's election with traverse of claims 1-29 & 32-47 in the reply filed on 1/7/05 is acknowledged. The traversal is on the ground(s) that "the claims would appear to be part of an overlapping search area". This is not found persuasive because the assumption that a close relationship exists between the two invention is apparent, however, this in itself does not overcome the restriction requirement. According to the MPEP 803 the proper criteria between for a restriction is (1) the invention must be independent and separated and (2) there must be serious burden on the Examiner if the restriction is not required. The product and the process of manufacturing an dielectric film are considered to be separated and independent by the Office. They are classified in two different art classifications . It would be a serious burden on the Examiner to examine two such distinct inventions despite the fact that they are so closely related.

The requirement is still deemed proper and is therefore made FINAL.

Claims 30,31 & 48 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 19/1/05.

Art Unit: 2813

In addition to the above Applicant's election of Group I, claims 1-29 & 32-47 contains claims directed to the following patentably distinct species of the claimed invention:

a) Species I, drawn to a method of treating a dielectric film. It appears that claims 1-29 & 45-47 read on the species.

b) Species II, drawn to a processing system for treating a dielectric film. It appears that claims 32- 44 read on the species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either

Art Unit: 2813

instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Steven P. Weihrouch on 2/9/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
